

Serial No.: 10/751,009
Docket No. SHE0074.00

In the Specification:

Please amend the paragraph beginning at page 85, line 24, as follows:

As previously described, the conjugates can be administered ~~injected~~ parenterally by intravenous injection, or less preferably by intramuscular or by subcutaneous injection. Suitable formulation types for parenteral administration include ready-for-injection solutions, dry powders for combination with a solvent prior to use, suspensions ready for injection, dry insoluble compositions for combination with a vehicle prior to use, and emulsions and liquid concentrates for dilution prior to administration, among others.

(This space intentionally left blank.)
